

THIS is ICS
MIDDLE SCHOOL

www.theICS.org

ENGLISH/LANGUAGE ARTS

Students read and analyze non-fiction selections from the online site Newsela. Topics ranging from sports & culture to history & technology engage readers and improve comprehension skills

SCIENCE

The scientific method is put to work as students design, construct and fine-tune rollercoasters, hot & cold packs and earthquake resistant structures. Practical habits formed in the lab translate to real-life problem solving.

RELIGION

Students view current events and church history through the lens of our school motto "Be respectful, be responsible and be kind, because Christ matters." They emerge ready to face a difficult world with a faith-filled, compassionate heart.

SOCIAL STUDIES

Students develop thesis statements and projects in diverse mediums around this year's National History Day theme: Conflict & Compromise to be exhibited at the statewide competition held in March. Students master research techniques and presentation skills.

MATH

Across all ability levels our students justify and assess their work for computational accuracy and sound mathematical reasoning. Our students see beyond the procedure to get at the core of number sense so they are prepared for the rigors of high school math and beyond.
