

Math IXL Assignment Summer 2024

Directions for Rising 5th Grade (Grade-Level) - Intermediate 5 placement in 2024-2025

1. Be sure to log-on to <https://www.ixl.com/> using the username and password provided to you by ICS.
2. Complete the skills listed below at the **grade level you just completed** to review over the summer. As a rising fifth grader, you will review **fourth grade** skills.
3. In order to receive credit, summer work must occur on or after June 10, 2024 and be completed by August 26, 2024. This allows two months to complete the requirements for active practice. Time is best accrued over a number of practice periods throughout the summer in order to maintain skills.
4. Parents should sign the bottom of this form to indicate that your child has completed his/her summer work.
5. Please complete this checklist of required skills indicating the percentage achieved and the date each skill is completed. Students are asked to achieve a **minimum of 85% mastery** for each of the assigned skills. If an assigned skill was completed during the school year to 85%, students must continue to work on the skill for 10 minutes or to 100% mastery.
6. IXL summer work is worth 30 points if each of the assigned 15 skills is completed according to the criteria in #5. Points will be deducted if all skills are not completed or mastery is not achieved.
7. You are welcome to work on additional skills if you would like, however, these will not be graded.
8. **Please return this form to your Math teacher on the first day of school.**
9. If you have any questions regarding math summer work, please contact lmetzbower@theimmaculate.org

****Please be aware the skill numbers are sometimes adjusted by IXL.com over the summer. If the letter/number combination on the IXL website does not align to the list of assigned skills, please work on the skill that matches the **description**.****

Student Name: _____

IXL Skills Percentage	Date Completed
A.6 Writing numbers up to one million in words: convert words to digits	
D.3 Add two multi-digit numbers	
E.3 Subtract two multi-digit numbers	
F.7 Least common multiple
